PROFESSIONAL SUMMARY

Full-stack developer (MCA, 2026) who has designed, built and shipped four live production web applications end to end, on my own. Strong in React, Next.js, Node.js and MongoDB, comfortable in Java and Python. Seeking a full-stack or frontend developer role on an early-stage product team. Available immediately, remote or hybrid.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js (App Router), Tailwind CSS, Framer Motion, responsive design, PWA, accessibility
Backend: Node.js, Express.js, REST APIs, JWT auth, Socket.IO, WebSockets, cron jobs, rate limiting
Databases & AI: MongoDB (Atlas), Mongoose, Firestore, Redis (Upstash), schema design, Google Gemini API, Groq, prompt engineering
Tools & DevOps: Git, GitHub Actions, Vercel, Render, Postman, Figma, Jira, CI/CD, Agile

PROJECTS

Umbrix — Fresher Job Aggregation Platform umbrix.in

Next.js (App Router), TypeScript, MongoDB Atlas, Upstash Redis, Firebase Auth, Groq, Gemini, Vercel Cron

- Launched a job platform aggregating 20,000+ verified fresher openings from 160+ company career boards — Greenhouse, Lever, Ashby, SmartRecruiters and the Adzuna aggregator — on a scheduled cron pipeline with rate limiting and automatic expiry of stale listings.
- Screened every posting through a scam filter that runs before the database insert, tested across 11,500 postings with zero legitimate jobs blocked.
- Developed a 0–99 job-match scoring engine that explains every score, plus AI résumé parsing and ATS-friendly résumé tailoring on the Groq and Gemini APIs with automatic model fallback.
- Grew organic reach with 250+ programmatic SEO landing pages, JSON-LD structured data, Redis-backed rate limiting and offline PWA support.

GetFreeToolsAI — Browser-Based Tool Platform getfreetoolsai.com

Next.js, React, Tailwind CSS, WebAssembly, pdf-lib, PDF.js, Vercel

- Shipped 140+ free browser-based tools (PDF, image, audio, developer and calculator utilities) running fully client-side with WebAssembly, so user files never leave their device: no signup, no watermark, no file-size cap.
- Kept first page load under two seconds with lazy-loaded per-tool modules; Google indexed the site within 72 hours via route-level metadata, dynamic Open Graph images and a generated sitemap.

Veritas Picks — Editorial Discovery Platform veritas-picks.vercel.app · [source](#)

Next.js (App Router), TypeScript, MDX, static export, Vercel

- Built a curated discovery platform of editorial buying guides across 18 lifestyle categories, authored in MDX and served as fully static pages with zero client-side data fetches.
- Derived every page at build time — table of contents from headings, reading time, pin metadata with generated fallbacks — behind typed MDX frontmatter that the card, comparison table and FAQ components all read as one contract.

Sahayam — Real-Time Humanitarian Aid Platform sahayam-beta.vercel.app · [source](#)

React, Node.js, Express, MongoDB, Socket.IO, Firebase, Google Gemini API, JWT

- Built a real-time MERN platform matching blood donors to emergency requests in under a second using Socket.IO rooms keyed on blood group and location, with Firebase push for offline users and role-based access for four user types.
- Classified incoming requests with the Google Gemini API and secured the Express API with JWT authentication, rate limiting, Helmet headers and server-side validation.

EDUCATION

Master of Computer Applications (MCA) — Fakir Mohan University, Balasore, Odisha · 2024 – 2026

B.Sc. in Chemistry — Balikuda Degree College, Jagatsinghpur, Odisha · 2021 – 2024
